ABOUT THE EXISTING SYSTEM

There is no existing system where Shop owner can manage the gift products and shipping related tasks online. Existing system is not in reach of distant users. Our aim is to create system where owner can ship their product to different area or locations and can manage all details related to it. Existing system has risk of mismanagement of data.

Need of Proposed System

- ❖ With the help of E-Gift Shopee, owner will be able to maintain records of their gifts and payment in automated form so that it will be more effective to maintain records.
- ❖ User friendliness is provided in the application with various controls.
- ❖ New system will process accurate results as compare to manual calculations.
- ❖ Proposed system will Save shopping time and provide more convenience. The system will give opportunity to shop 24/7.

Comparing and researching product and their price is much easier online

- ❖ Proposed system will increase and motivates local shops to grow faster and broad their network.

Objectives of the Proposed System

- ❖ To maintain the details of product and payment.
- ❖ To increasing sales and to save time.
- ❖ To search products according to different categories.
- ❖ To provide user friendliness in the application with various controls.
- ❖ To manage details of bulk product. Also provides supplier feature so that owner can have record of the same.
- ❖ To provide customization on selected products.

Problem Statement

There are a lot of websites on internet which offers a variety of product and services for consumer through online such as shoe, cloths, sun glasses and more. Problem statement is view of online shopping by customer.

Some customer are not willing to take part in online purchase because they are worried about the quality of the product.

Scope of the proposed System

- ❖ **Gift Module:** Used to managing the gift information
- ❖ **User Module:** Used for managing the user details of the system
- ❖ **Login Module:** Used for managing the login details
- ❖ **Supplier Module:** Used for managing the supplier details
- ❖ **Payment Module:** Used for payment related details.
- Customization Module:** Used for customize the available product.
