Name of Project Guide : Mrs. Preetha Praseedh

Introduction : The E-Gift Shoppe needs to sell different types of gift products to customer living in any part of the world. The website will show all products in categorized manner. Customer can browse

any product for its price and other details and can order the product. Orders needs to accompany with shipping & billing details.

Outcome of the Project: Products can be managed by operators from admin panel. Operator can be created by admin. Admin can keep track of orders through admin panel. The main purpose of the system is to enable customers to browse and order from any part of the world and hence increasing business scope.
